

Panduan Senam Aerobic Colour Ball

Jurnal Kebidanan Khatulistiwa. JKK. PEMANFAATAN VIDEO PANDUAN SENAM HAMIL DALAM MENINGKATKAN PENGETAHUAN DAN PELAKSANAAN SENAM IBU HAMIL.

Latar Belakang: senam hamil mempunyai manfaat dalam persiapan dan melatih otot sehingga membantu dalam persalinan normal. Manfaat senam hamil akan dirasakan ibu hamil selama dilaksanakan secara rutin. Rendahnya partisipasi ibu hamil mengikuti kelas senam hamil belum berbanding lurus dengan manfaat senam hamil. Video panduan senam hamil merupakan media yang dapat dilihat dan didengar sehingga bisa digunakan sebagai panduan melakukan senam hamil secara mandiri maupun berkelompok. Tujuan: untuk mengetahui sejauhmana manfaat video panduan senam hamil dalam meningkatkan pengetahuan dan pelaksanaan senam hamil secara rutin baik secara mandiri maupun bergabung dalam kelas senam hamil. Metode Penelitian: menggunakan quasi eksperiment, desain pre post test only desain pada ibu hamil di Klinik Gemilang, pengambilan sampel dengan metode purposive sampling, sampel penelitian sebanyak 30 ibu hamil, data dianalisis univariat dan bivariat. Hasil: peningkatan pengetahuan dan pelaksanaan senam hamil setelah diberi video panduan senam hamil pada kelompok ibu yang tidak mengikuti kegiatan senam hamil dengan nilai p-value 0,000 serta pada kelompok ibu yang mengikuti kelas senam hamil dengan p-value 0,000. Kesimpulan: media video panduan senam hamil bermanfaat dalam meningkatkan pengetahuan maupun pelaksanaan senam hamil.

. Sport Science. jss. Pengaruh Latihan Senam Aerobic Mixed Impact Terhadap Berat Badan Anggota Sanggar Senam Female Aerobic Centre Padang..

Penelitian ini bersifat eksperimental yaitu yaitu memberikan perlakuan terhadap Anggota Sanggar Female Aerobic Centre Padang. Karena penelitian ini tidak menggunakan kelompok kontrol, maka penelitian ini termasuk kedalam eksperimen semu.. Tujuan penelitian untuk mengetahui program latihan senam aerobic mixed impact yang tepat untuk Anggota Sanggar Senam Female Aerobic Centre Padang,

untuk mengetahui perubahan berat badan Anggota Sanggar Senam Female Aerobic Centre Padang, untuk mengetahui pengaruh latihan senam aerobic mixed impact terhadap berat badan Anggota Sanggar Senam Female Aerobic Centre Padang. Populasi dalam penelitian ini adalah Anggota Sanggar Senam Female Aerobic Centre Padang yang berjumlah 30 orang. Teknik pengambilan sample adalah total sampling. Karena jumlah populasi yang relative sedikit, maka semua populasi dijadikan sampel yaitu sebanyak 30 orang. Data dianalisis dengan menggunakan teknik persentase. Hasil yang diperoleh dalam penelitian adalah sebagai berikut : uji t antara pengaruh Latihan Senam Aerobic Mixed Impact terhadap berat badan diperoleh thit 4.39 untuk ttab pada taraf signifikan $\alpha = 0,05$ yaitu 2.04. Berarti dalam hal ini terdapat pengaruh yang berarti antara Latihan Senam Aerobic Mixed Impact terhadap berat badan anggota sanggar senam female aerobic centre padang.

. Jurnal Health Sains. JHS. Pengaruh Senam Aerobic Terhadap Skala Dismenore Pada Peserta Senam Di Gedung Barata.

Di Indonesia, diperkirakan 55% perempuan usia produktif mengalami dismenore, dengan 54,89% mengalami dismenore primer dan 45.11% mengalami dismenore sekunder. Sampai saat ini metode pengobatan yang khusus untuk dismenore masih kurang sehingga para ahli menyarankan menggunakan metode nonmedis dengan aktivitas fisik yaitu berolahraga. Salah satu jenis olahraga yang paling banyak digemari adalah Aerobic. Latihan olahraga aerobic mampu mengurangi gejala-gejala gangguan menstruasi seperti dismenore yaitu mengurangi kelelahan dan stress. Tujuan penelitian ini adalah melihat pengaruh senam aerobic terhadap skala dismenore serta melihat hubungan antara keduanya. Penelitian ini menggunakan metode kuantitatif bersifat survey-analitik dengan desain crosectional study. Sampel sebanyak 53 orang diambil dari total sampling peserta senam aerobic di Gedung Barata. Analisa dilakukan dengan menggunakan dua uji yaitu Uji Wilcoxon Signed Ranks Test dan uji Chi-Square Tes. Hasil penelitian menunjukkan bahwa ada perbedaan derajat nyeri dismenore antara sebelum dan sesudah mengikuti senam aerobic namun demikian, tidak ada hubungan antara senam aerobic dengan derajat nyeri dismenorea pada peserta senam Gedung Barata Banda Aceh. Senam Aerobic bukan merupakan variabel yang secara langsung dapat berhubungan dengan perurunan derajat nyeri dismenorea

. Sriwijaya Journal of Sport. Sriwij. j. Sport. Apa Alasan Orang Ikut Senam Aerobic Di

Sanggar Senam?.

Menjaga kebugaran merupakan aktivitas positif bagi kehidupan. Banyak pilihan cara untuk menjaga kebugaran. Senam aerobik merupakan salah satu pilihan untuk menjaga kebugaran. Faktor kemalasan ataupun alasan kesibukan terkadang menjadi kendala untuk orang mengikuti senam, di samping jarak yang jauh ataupun biaya yang harus dikeluarkan. Tujuan penelitian ini untuk mendeskripsikan motivasi anggota senam aerobik mengikuti kegiatan senam. Responden terdiri dari anggota senam yang terdapat di tujuh (7) sanggar senam yang ada di Kuburaya Kalimantan Barat, dengan jumlah sampel 86 orang yang mengisi angket secara sukarela. Instrumen penelitian berupa angket yang menanyakan dua variable motivasi intrinsik dan ekstrinsik. Data hasil penelitian di analisis dengan menggunakan statistik deskriptif. Hasil penelitian menunjukkan bahwa nilai motivasi intrinsik dan ekstrinsik hampir sama besar dengan nilai mean intrinsic 85,35 dan ekstrinsik 81,45, berdasarkan hasil ini dapat disimpulkan bahwa, apa pun motivasi awal dan sampai proses tetap aktif melakukan senam tidak akan menjadi peran. Hal terpenting adalah kontinuitas melakukan aktivitas senam untuk menjaga kebugaran.

. AbdiMuh. abdimuh. SOSIALISASI DAN LOMBA SENAM AEROBIC GYMNASTICS SE- DIY.

Kegiatan pengabdian pada masyarakat ini bertujuan untuk mengenalkan cabang olahraga senam aerobic gymnastics kelompok National Development pada khalayak ramai, mencari bibit unggul atlet aerobic gymnastics dan memberikan pengalaman bagi anak-anak untuk mengenal disiplin senam yang baru. Tujuan tim pengabdi adalah melaksanakan Tri Dharma Perguruan Tinggi dalam bentuk pengabdian kepada masyarakat serta menjalin kerja sama dengan berbagai pihak dalam rangka memperkenalkan cabang olahraga senam aerobic gymnastics. Kegiatan sosialisasi dan lomba senam aerobic gymnastics ini diikuti oleh guru-guru serta siswa sekolah dasar usia 9-11 tahun di Daerah Istimewa Yogyakarta. Kegiatan sosialisasi dilaksanakan secara luring dengan mengundang perwakilan pengurus Pengda PERSANI selaku Mitra, pengurus pengkab/pengkot, guru olahraga, dan pelatih, berjumlah 19 orang. Pelaksanaan sosialisasi di Fakultas Ilmu Keolahragaan Universitas Negeri Yogyakarta. Lomba senam aerobic gymnastics diikuti oleh 32 peserta dan dinilai oleh tiga juri secara daring. Hasil pengabdian ini adalah tersampaikannya sosialisasi dan pengenalan olahraga aerobic gymnastics bagi

Pengkab/kota Persani, Guru Olahraga Sekolah Dasar, siswa sekolah dasar, orangtua dan pelatih. Terlaksananya kegiatan lomba senam aerobic gymnastics, terciptanya paket senam untuk siswa usia 9-11 tahun. Kegiatan ini sebagai ajang identifikasi bakat calon atlet aerobic gymnastics yang dapat diarahkan untuk berlatih senam sehingga kelak dapat memberikan prestasi di DIY. Hasil dari kegiatan ini akan dipublikasikan ke dalam jurnal.

. PROSIDING SEMINAR KESEHATAN MASYARAKAT. PRIMA KESMAS. Senam Dalam Prespektif Islam: Studi Kasus Senam Aerobic Bagi Ibu-Ibu di Desa Wuled. Latar belakang: Olahraga dalam Islam sangatlah dianjurkan. Salah satu jenis olahraga yang dapat dilakukan adalah senam. Esensi senam adalah kreasi gerakan-gerakan tubuh yang teratur untuk mencapai tujuan tertentu diantaranya adalah kebugaran, kesehatan, dan penyembuhan atau bahan untuk mendapatkan bentuk tubuh yang indah. Akan tetapi Islam memberi batasan bagi umatnya dalam melaksanakan aktifitas termasuk senam. Metode: Penelitian ini menggunakan metode kualitatif diskriptif dengan pendekatan studi kasus senam Aerobic yang dilakukan oleh ibu-ibu di desa Wuled, Kecamatan Tirto, Kabupaten Pekalongan. Hasil: Pelaksanaan senam Aerobic yang dilakukan oleh ibu-ibu di desa Wuled belum sepenuhnya sesuai dengan syariat Islam, dijumpainya pelaksanaan senam di tempat terbuka dan sebagian masih mengenakan busana yang ketat harus menjadi perhatian. Kesimpulan: Sebagai seorang muslimah harus benar-benar memahami tuntunan berolahraga menurut ajaran agama Islam sehingga aktivitas olahraga yang bertujuan untuk kebaikan, menjadi aktivitas yang tidak bertentangan dengan agama. Untuk itu disarankan dalam berolahraga mengenakan pakaian yang tidak memperlihatkan aurat dan lekuk tubuh, serta memilih tempat tertutup untuk menghindari diri dari fitnah.

. Jurnal Skolastik Keperawatan. J. S. K. UNAI. EFEKTIVITAS SENAM AEROBIC TERHADAP KADAR GULA DARAH PREDIABETES KELOMPOK IBU-IBU SENAM DI GOR UNAI KECAMATAN PARONGPONG KABUPATEN BANDUNG BARAT.

Penelitian ini di latar belakangi oleh prevalensi DMT2 di daerah perkotaan Indonesia yaitu 5,7% sedangkan prevalensi pre-diabetes hampir dua kali lipatnya yaitu 10,2%. Kebanyakan masyarakat Indonesia memilih untuk memeriksakan dirinya ketika sudah mengalami penyakit DMT2 terlebih dahulu, dibandingkan dengan mencegahnya. Pre-diabetes dapat dicegah dengan berbagai cara, salah satunya

dengan cara berolahraga. Olahraga yang digunakan yaitu olahraga senam aerobic yang dapat dibilang murah dan dapat diikuti oleh semua generasi. Peneliti ingin mengetahui apakah ada perbedaan pada kadar gula darah sebelum dan sesudah setelah diberikan senam aerobic. Desain metode penelitian menggunakan perlakuan berulang (One Group Pretest-Posttest Design). Peneliti akan melakukan pengecekan kadar gula darah puasa sebelum dilakukan senam aerobic dan setelah melakukan senam aerobic, responden akan dicek kembali kadar gula darah puasa. Populasi yang digunakan 35 ibu-ibu yang selalu mengikuti senam aerobic selama 3 kali seminggu dan sampel yang digunakan berjumlah 9 responden. Sampel dipilih menggunakan teknik total sampling. Hasil yang didapatkan setelah penelitian selama 3 kali seminggu, dengan menggunakan rumus mean dan paired t test, didapatkan bahwa hasil rata-rata kadar gula darah puasa sebelum diberikan intervensi adalah 106,56 dan hasil rata-rata kadar gula darah puasa sesudah diberikan intervensi adalah 107,44. Hasil thitung yang didapatkan adalah 0,206 lebih kecil dibandingkan ttabel yaitu 1,860 dan dapat ditarik kesimpulan bahwa Ho diterima (tidak ada perbedaan sebelum dan sesudah dilakukan senam aerobic. Bisa terjadi kenaikan akibat responden sebelum puasa mengkonsumsi makanan yang membuat gula darah menjadi naik. Saran kepada peneliti selanjutnya melanjutkan penelitian ini dengan populasi yang lebih banyak dan melakukan penelitian lebih lama dari penelitian sebelumnya. Kata kunci: Senam aerobic, kadar gula darah, pre-diabetes

. PENA NURSING. pn. Intervensi Senam Aerobic Low Impact Sebagai Upaya Mengontrol Halusinasi Pendengaran: Studi Kasus.

On January 16, 2023, it was recorded that 64 mental patients were treated in the Walet room at the Mental Hospital in West Kalimantan Province, out of 64 people, 47 people with mental disorders had auditory hallucinations. Management of clients with auditory hallucinations. it is very important to avoid the consequences such as injuring yourself, others and the environment. In the swallow room, management has been carried out with several interventions, namely Implementation Strategy (1), namely helping clients get to know hallucinations, content, time, frequency, situations that cause hallucinations and responses. Implementation Strategy (2) Practice controlling hallucinations by scolding. Implementation Strategy (3) Evaluation of SP2, Train clients how to control hallucinations by conversing with other people.

Implementation Strategy (4) Evaluation of SP2 and SP3 Practice controlling hallucinations by carrying out scheduled activities. Implementation Strategy (5) Evaluation of SP2, SP3 and SP4. Practice controlling hallucinations by taking medication and include all interventions in the daily activity schedule. In the fourth implementation strategy (4), namely training to control hallucinations by carrying out scheduled activities, it is necessary to add proper management, namely by increasing group activities so that they return to perceptions that are in accordance with reality. One of them is by doing physical activities such as low impact aerobics. One effort to overcome this is to make patients with auditory hallucinations have activities that reduce the stimulus for the appearance of hallucinations, one of which is by doing low impact aerobic exercise. The aim of the care given is to apply low impact aerobic exercise to clients of auditory hallucinations in the Swallow Room of the West Kalimantan Provincial Mental Hospital in 2023. The patient's initials are Mr. MA, 27 years old, was admitted to the hospital because she was often angry, her emotions were out of control, she often broke things, and the client had slashed her friend. While being treated, the patients said that someone was whispering in his ear, and there was a sword accompanying him. The results of implementing the low impact aerobic exercise intervention for three times a week showed that the frequency of hallucinations decreased. Low impact aerobic exercise can be performed as an additional intervention to increase the activity of patients with hallucinations. Low impact aerobics can be applied to fill in the scheduled activities of patients with auditory hallucinations

. Jurnal Anestesi. Anestesi. Senam Birth Ball dalam Mengatasi Nyeri pada Persalinan Kala I.

Physiologically, pain is generally felt by all mothers who face the birth process. Pain arises due to uterine contractions which are useful for opening the cervix. However, intense pain can disturb comfort and can affect psychological conditions. As many as 46% of primigravida mothers experienced severe pain, 64% experienced mild to moderate pain. In multigravida mothers, 37% experienced severe pain and 63% experienced moderate and mild pain. One way to overcome severe pain in the first stage is birth ball exercises. The aim of the research was to determine the effect of using a birth ball on first stage labor pain. The design of this research was a quasi-experimental one group with control group. The population in this study were all

mothers giving birth at PMB Dewi Anggraini in March-April 2024, totaling 28 respondents. The sampling technique used is total sampling. Statistical tests use the Independent Sample T Test. The average pain in the intervention group was 3.52 and the average labor pain in the control group was 5.52, meaning there was a reduction in pain levels of 2.00. The significant value was found to be $p: 0.001 < 0.05$, meaning that there was a difference in the pain scale of the first stage of labor in the groups that used a birth ball and those that did not use a birth ball. It is hoped that health workers can improve maternal care during childbirth, one of which is by inviting mothers to use a birth ball.

. Gelanggang Olahraga: Jurnal Pendidikan Jasmani dan Olahraga (JPJO). JPJO. Pengaruh Senam Aerobic Low Impact terhadap Peningkatan VO2max.

This study aims to see the effect of low impact aerobic exercise on VO2Max capacity improvement. The population in this study were students of SMK Negeri 1 Curup who follow extracurricular aerobic exercise. Sampling was done by purposive random sampling technique which amounted to 24 people. The analysis was done by measuring the ability of VO2Max through bleep test before and after given low impact aerobic exercise. Data were analyzed by different test formula t test. The result of the research is $t_{hitung} = 6.04$ greater than $t_{table} = 1.714$. H_0 is rejected and H_a is accepted meaning hypothesis stating there is significant influence between low impact Aerobic aerobic exercise to increase VO2max student SMK Negeri 1 Curup accepted empirically truth. The result of research that there is significant influence by low impact aerobic gymnastics exercise to increase VO2Max Student SMK Negeri 1 Curup who follow extracurricular aerobic gymnastics. Keywords: Aerobic Low Impact, VO2Max

. Jurnal Health Society. JHS. Pengaruh Senam Aerobic Low Impact Terhadap Penurunan Tekanan Darah Pada Penderita Hipertensi.

Pendahuluan: Hipertensi merupakan penyakit degeneratif kronis akibat gangguan pada sistem peredaran darah masih menjadi masalah kesehatan masyarakat. Latihan Aerobik Low Impact Bagi Anggota Prolanis merupakan upaya non farmakologi untuk mengatasi hipertensi. Jika ada tekanan darah sistolik lebih dari 140 mmHg dan tekanan darah diastolik lebih dari 90 mmHg, maka disebut hipertensi. Tujuan penelitian ini untuk mengetahui pengaruh latihan aerobic low impact anggota prolanis terhadap penurunan tekanan darah. Metode: Desain

penelitian ini yaitu quasi eksperimen dengan desain pre-and pos-test. Sampel sebanyak 17 orang, menggunakan Teknik purposive sampling. Metode pengumpulan data menggunakan kuesioner. Analisis data dilakukan dengan melihat gambaran karakteristik responden, analisa univariate dan analisa bivariat menggunakan uji wolcoxon. Hasil: Hasil uji bivariat didapatkan p-value sebesar 0,000 menunjukan terdapat pengaruh senam Aerobic Low Impact dengan penurunan tekanan darah. Kesimpulan : pada penelitian ini terdapat pengaruh senam Aerobic Low Impact dengan penurunan tekanan darah. Diharapkan hasil penelitian ini dapat memberikan informasi dan menjadi alternatif program kesehatan olahraga Puskesmas untuk diluar prolanis untuk dapat dilanjutkan senam Aerobic Low Impact pada penderita hipertensi lainnya.

. Nature. Nature. Old whisky changes colour. The Pink Ball in Cricket: A Call to Investigate the Impact of Ball-Colour on Visual-Motor Behaviour.

The sport of cricket has recently undergone a unique transformation with the introduction of day-night test cricket, where the traditional red ball has been substituted with a fluorescent pink ball. Although the concept continues to gain popularity among the wider population, there are growing concerns regarding the visibility of the fast-moving ball along with seemingly little knowledge on how ball-colour may influence the visual-motor behaviour of the players. This paper seeks to highlight some of these concerns by exploring how the pink colour may influence colour contrast and perception, and visual perception. By better understanding the influence of ball-colour on visual-motor behaviour, sporting administrators and researchers alike can work towards further progressing the sport without impacting player safety and/or performance.

. Jurnal MensSana. jm. PERBEDAAN LATIHAN SENAM MIXED IMPACT AEROBIC DAN BODY LANGUAGE TERHADAP INDEKS MASSA TUBUH.

Penelitian ini bertujuan untuk melihat “perbedaan pengaruh latihan senam mixed impact aerobic dan body language terhadap indeks massa tubuh.” Penelitian ini merupakan penelitian eksperimen semu, karena jumlah anggota populasi penelitian terbatas. Jumlah populasi adalah sebesar 20 orang dan seluruh anggota populasi dijadikan sampel, yaitu anggota Studio Senam Hayati Kota Padang. Data body mass index diambil melalui berat dan tinggi badan dari anggota sanggar. Data diperoleh dengan dua cara yaitu tes awal (sebelum perlakuan) dan tes akhir (sesudah

perlakuan) dengan tujuan untuk melihat seberapa besar perbedaan pengaruh metode latihan terhadap berat badan. Data diolah dan dianalisis menggunakan uji t. Hasil penelitian menunjukkan bahwa (1) latihan senam mixed impact aerobic didapat thitung $2,88 > ttabel$ $2,262$ hal ini berarti signifikan terhadap penurunan indeks massa tubuh anggota sanggar; (2) latihan body language didapat thitung $3,74 > ttabel$ $2,262$ berarti signifikan terhadap penurunan indeks massa tubuh anggota sanggar; dan (3) tidak terdapat perbedaan pengaruh antara latihan senam mixed impact aerobic dan body language terhadap penurunan indeks massa tubuh anggota Studio Senam Hayati Kota Padang.

. Mega Buana Journal of Nursing. MBJN. Senam Aerobic Low Impact dalam Menurunkan Tekanan Darah Pada Penderita Hipertensi.

Olahraga senam adalah salah satu penatalaksanaan nonfarmakologi yang harus dilakukan pada seseorang yang memiliki hipertensi untuk mengurangi ketergantungan terhadap obat anti hipertensi. Senam aerobic low impact merupakan senam hipertensi yang bermanfaat untuk menjaga keseimbangan denyut nadi dan dapat menurunkan hipertensi jika melakukan olahraga secara rutin dan tepat. Tujuan penelitian ini untuk mengetahui pengaruh senam aerobic low impact terhadap perubahan tekanan darah pada penderita hipertensi di wilayah kerja puskesmas wara utara kota, kota palopo. Penelitian ini menggunakan jenis penelitian quasy eksperimen dengan menggunakan rancangan “One Group Pre test and Post test design” yang melibatkan kelompok intervensi, populasi dalam penelitian ini semua penderita hipertensi yang berada di wilayah kerja Puskesmas Wara Utara Kota, Kota sebanyak 203 orang. Sampel dalam penelitian ini diambil sebanyak 15 orang dengan metode Purposive Sampling. Analisis data dalam penelitian ini menggunakan uji paired sample t-test. Hasil penelitian menunjukkan bahwa ada perbedaan perubahan tekanan darah sebelum dan setelah melakukan senam aerobic low impact dengan nilai (p value $0.000 < 0.05$).

. Physio Journal. Physio. Pengaruh Senam Aerobic Low Impact Terhadap Penurunan Tingkat Stres Pada Lansia.

Lansia mengeluhkan rasa gelisah dan perasaan khawatir yang berlebihan. Lansia tersebut mengalami stres yang disebabkan kurangnya olahraga, karena aktivitas kesehariannya yang monoton sehingga malas untuk melakukan olahraga. Stres pada lansia dapat dikurangi dengan senam aerobic low impact. Senam aerobic low

impact salah satu senam ringan yang dapat dilakukan oleh lansia untuk menimbulkan efek rileksasi agar dapat mengurangi tingkat stres. Penelitian ini bertujuan untuk mengetahui pengaruh senam aerobic low impact terhadap penurunan tingkat stres pada lansia. Penelitian ini menggunakan metode pre experimental dengan rancangan penelitian one group pre and post test without control design. Pengambilan sampel dengan simple random sampling dengan jumlah sampel sebanyak 18 responden. Alat ukur yang digunakan dalam penelitian ini Depression Anxiety Stress Scale (DASS). Penelitian ini dilakukan 3 kali dalam seminggu selama 4 minggu dengan durasi 30 menit setiap kali latihan. Hasil penelitian menunjukkan Zhitung>Ztabel ($3,873 > 1,96$) dengan $p=0,001$ ($p<0,05$), hal ini bermakna bahwa terdapat pengaruh senam aerobic low impact untuk mengurangi tingkat stres pada lansia. Kesimpulan dari penelitian ini yaitu senam aerobic low impact bermanfaat untuk mengurangi tingkat stres pada lansia.

. JURNAL KESEHATAN TROPIS INDONESIA. JURNAL KESEHATAN TROPIS INDONESIA. Hubungan Senam Aerobic Low Impact Dengan Penurunan Berat Badan Pada Akseptor KB.

Penggunaan kontrasepsi suntik 3 bulan sering dikaitkan dengan peningkatan berat badan akibat perubahan hormonal. Salah satu upaya non-farmakologis yang dapat dilakukan untuk mengontrol berat badan adalah melalui aktivitas fisik, seperti senam aerobik low impact. Senam ini dikenal efektif membakar kalori dengan intensitas rendah hingga sedang, serta memiliki risiko cedera yang lebih rendah, sehingga cocok untuk berbagai kelompok usia, termasuk ibu-ibu akseptor KB. Penelitian ini bertujuan untuk mengetahui hubungan antara senam aerobik low impact dengan penurunan berat badan pada akseptor KB suntik 3 bulan di Padangsidimpuan. Metode: Penelitian ini menggunakan pendekatan kuantitatif dengan desain cross-sectional. Populasi dalam penelitian ini adalah seluruh akseptor KB suntik 3 bulan yang mengikuti program senam aerobik low impact secara rutin. Pengumpulan data dilakukan melalui observasi, wawancara, dan pengukuran berat badan sebelum dan sesudah intervensi. Analisis data dilakukan dengan uji Chi-Square. Hasil uji statistik menunjukkan nilai p-value sebesar 0,000 ($< 0,05$), yang berarti terdapat hubungan yang signifikan antara senam aerobik low impact dengan penurunan berat badan pada akseptor KB suntik 3 bulan. Terdapat hubungan yang signifikan antara pelaksanaan senam aerobik low impact secara rutin dengan penurunan berat badan

pada akseptor KB suntik 3 bulan. Disarankan agar senam aerobik low impact dijadikan alternatif program pendamping bagi pengguna kontrasepsi hormonal untuk menjaga berat badan ideal.

. Jurnal Kesehatan Kusuma Husada. KesMaDaSka. SENAM AEROBIC UNTUK MENGATASI NYERI MENSTRUASI PADA REMAJA PUTRI DI PONDOK PESANTREN AL ISHLAH SEMARANG.

Dismenore merupakan nyeri yang biasanya bersifat kram dan berpusat pada perut bagian bawah yang terasa selama menstruasi, terkadang sampai parah sehingga mengganggu aktivitas. Prevalensi nyeri menstruasi pada remaja di Indonesia berkisar antara 43% hingga 93%. Tujuan penelitian ini untuk mengetahui pengaruh olahraga senam aerobic terhadap nyeri dismenorea pada remaja putri di Pondok Pesantren Al Ishlah Semarang. Penelitian ini menggunakan rancangan kuasi eksperimental Two groups Pre Test and Post Test with control. Instrumen nyeri yang digunakan adalah Numeric rating Scale (NRS), dengan skala 0-10. Penelitian dilakukan pada 50 remaja putri yang mengalami nyeri menstruasi. Remaja yang memenuhi kriteria pada skrining diberikan latihan fisik berupa aerobic pada kelompok perlakuan dan jogging pada kelompok kontrol. Latihan fisik dilakukan 2 kali terjadwal dalam seminggu, masing-masing minimal 30 menit selama 3 siklus menstruasi. Rata-rata nyeri dismenore sebelum dilakukan tindakan adalah $3.24+0.523$ dan setelah intervensi $1.08+0.277$. Hasil uji dengan Mann Whitney didapatkan senam aerobic lebih efektif untuk mengurangi nyeri dibandingkan jogging dengan mean rank sebesar 20,96 dan nilai p value 0.000. Olahraga mampu meningkatkan produksi endorphin (penghilang rasa sakit alami tubuh) sehingga menghilangkan nyeri ketika menstruasi. Selain itu, olahraga dapat meningkatkan pasokan darah ke organ reproduksi sehingga memperlancar peredaran darah. Diharapkan remaja putri dapat rutin melakukan olahraga senam aerobic minimal 1 kali dalam seminggu untuk mengurangi nyeri menstruasi. Dysmenorrhea is pain usually cramping and centered on the lower abdomen that is felt during menstruation, sometimes to severe so that it interferes with activity. The prevalence of menstrual pain in adolescents in Indonesia ranges from 43% to 93%. The purpose of this study was to determine the effect of jogging on dysmenorrhoea pain in young girls at Al Ishlah Islamic Boarding School in Semarang. This study used an experimental design of Two groups Pre Test and Post Test with control. The pain

instrument used was the Numeric rating Scale (NRS), with a scale of 0-10. The study was conducted on 50 young women who experience menstrual pain. Adolescents who met the screening criteria were given physical exercise in the form of aerobics in the treatment group and jogging in the control group. Physical exercise was scheduled twice a week, each with a minimum of 30 minutes for 3 menstrual cycles. The mean pain of dysmenorrhea before the action was $3.24 + 0.523$ and after the intervention $1.08 + 0.277$. Aerobic exercise was more effective in reducing pain than jogging with a p value of 0,000. Exercise could increase endorphin production (the body's natural pain reliever) so that pain relief during menstruation. In addition, exercise could increase blood supply to the reproductive organs thereby improving blood circulation. It was expected that young women can routinely exercise at least once a week to reduce menstrual pain.

THE CATASTROPHIC HISTORY OF YOU AND ME

The Catastrophic History of You and Me: A Lingering Tale of Woe

In this article, we delve into the tumultuous past of a relationship that was marred by a series of catastrophic events. We explore the questions that haunted those involved and the answers that emerged as they grappled with the aftermath of their fractured bond.

Question 1: What were the early signs of trouble?

Answer: The relationship began with a false sense of euphoria, masking deep-seated incompatibilities. Lack of communication and unmet expectations laid the foundation for future conflicts.

Question 2: What specific incidents precipitated the catastrophe?

Answer: A series of public confrontations, betrayals of trust, and financial strains pushed the relationship to the brink. The weight of unresolved issues became unbearable.

Question 3: How did the relationship end and what were its immediate consequences?

Answer: The final straw came in the form of a devastating argument. The relationship dissolved in acrimony, leaving both parties shattered and reeling from the emotional and psychological damage.

Question 4: What lessons were learned from the experience?

Answer: In the aftermath, the individuals involved gained valuable insights into the importance of open communication, setting boundaries, and valuing self-worth. They recognized the need for personal growth and accountability.

Question 5: Is there any hope for reconciliation or closure?

Answer: The extent of the damage and the unwillingness to confront the past may make reconciliation impossible. However, closure can be achieved through introspection, forgiveness, and learning from the mistakes that led to the catastrophic end.

ISO 22716 CHECKLIST

What is the ISO 22716 standard? This ISO standard is the benchmark in cosmetics GMP. ISO 22716 certification helps businesses identify and mitigate the risks associated with production that can impact product safety and quality.

What is the difference between ISO 22716 and ISO 9001? ISO 9001 is the most recognised of all quality standards worldwide, and ISO 22716 can be seen as an

additional certification for those specific to the cosmetics industry.

What is the difference between ISO 22716 and ISO 13485? ISO 22716:2007 is a standard that covers Good Manufacturing Practices for cosmetic products, while ISO 13485:2016 is a standard that covers requirements for developing quality management for the manufacturers of medical devices.

How to prepare ISO 9001 audit checklist?

Is ISO 22716 accredited? ISO 22716 Good Manufacturing Practices (GMP) for Cosmetics The guidelines for the standard has been approved and accepted by a many global regulatory bodies, such as the International Cooperation on Cosmetics Regulation (ICCR), Food & Drug Administration (FDA) and the European Committee for Standardisation (CEN).

What is the cost of ISO 22716 certification? ISO 22716:2007 FOR RS. 4,000/- ISO consulting services require organizations to help establish a complete quality management system that meets all the requirements of ISO 22716:2007.

What are the benefits of ISO 22716 2007? ISO 22716:2007 gives guidelines for the production, control, storage and shipment of cosmetic products. These guidelines cover the quality aspects of the product, but as a whole do not cover safety aspects for the personnel engaged in the plant, nor do they cover aspects of protection of the environment.

What has replaced ISO 9001? About ISO 9001:2015 ISO 9001:2015 was published in September 2015. It replaced ISO 9001:2008 and it remains the current version of ISO 9001 - at least for now.

Which is better Six Sigma or ISO 9001? It is not an either/or choice between ISO 9001 and Six Sigma; both can be used. ISO 9001 will provide the QMS framework, and Six Sigma can help provide the process improvements required by the quality management system.

Do I need ISO 9001 and ISO 13485? ISO 9001 is the international standard which provides specifications for a quality management system which can be applied at any organization regardless of industry, product or service, or company size. ISO

13485 is a comprehensive management system specifically for the manufacture of medical devices.

Does FDA recognize ISO 13485? Now that FDA has incorporated ISO 13485:2016, what happens if the standard is revised? A: Any future revisions to this standard would need to be evaluated to determine the impact of the changes and whether the QMSR should be amended. If needed, amendments to the QMSR will be implemented through rulemaking.

Is ISO 13485 mandatory? While it's widely held that ISO 13485 is mandatory for medical device manufacturers, the truth is that certification is voluntary. There is no requirement for OEMs to hold ISO 13485, but it does carry international clout.

What are the five audit checklists?

What is ISO checklist? An ISO 9001 audit checklist helps the auditor to gather documentation and information about quality objectives, corrective action, internal issues, and customer satisfaction. A typical audit checklist might look like this: Question # ISO 9001 Clause. Audit Question.

How to internal audit checklist?

What is an ISO 22716 certificate? ISO 22716 is a set of Good Manufacturing Practices (GMP) Guidelines for the cosmetics industry. Certification to ISO 22716 allows organizations to demonstrate their commitment to safeguarding quality and safety. ISO 22716: Good Manufacturing Practices (GMP) ISO 22716 services.

What is the difference between ISO 9001 and ISO 22716? ISO 9001 is the most recognized of all quality standards worldwide, and ISO 22716 can be seen as an additional certification for those specific to the cosmetics industry.

Is ISO 9001 equivalent to GMP? ISO 9001 is a Quality Management System standard, while GMP stands for Good Manufacturing Practices. Both are equally important, but ISO 9001 applies to any industry, and GMP is only for manufacturing food, drugs, cosmetics, and medical devices.

How much does it cost to get ISO 9001 certified in the US? ISO 9001 Certification Cost per Project You can expect to pay between \$2,000 and \$4,000 for

ISO 9001 certification fees per ISO project. ISO 9001 consultants will ask for an additional ISO consulting fee if your organization wants to ensure ISO system maintenance and ISO compliance in future years.

How hard is it to get ISO 9001 certified? ISO 9001 certification process You will be surprised at how simple the process is once you understand the requirements of ISO 9001. Mainly, ISO 9001 certification involves organising processes, commitment, and reviews. It also includes developing and managing an effective Quality Management System (QMS).

How much does it take to get ISO 9001 certification? The fees for getting an ISO certification depends on different factors including the standards you are applying for. In general, the ISO certificate fees is around ?1,500-?2,500. ISO 9001 certificate is priced around ?3,999. However, IAF ISO 9001 certificate cost can range between ?3,000-?8,000.

What are GMP guidelines? GMP defines quality measures for both production and quality control and defines general measures to ensure that processes necessary for production and testing are clearly defined, validated, reviewed, and documented, and that the personnel, premises and materials are suitable for the production of pharmaceuticals and ...

What are the benefits of registering as an ISO?

What is ISO certification for a company? International Organization for Standardization (ISO) certification establishes credibility and trust among consumers, clients and other business partners. In today's international marketplace, such a designation validates that an organization adheres to global standards of quality assurance, manufacturing and business.

Why are companies not using ISO 9001? For some, a misconception about the objectives of the ISO 9001 standard or a lack of knowledge may steer them off this path. For others, it may be financing this goal plus the long-term costs associated with maintaining compliance.

What is the ISO certificate for 2024? ISO 22000: Food Safety Management This standard can work independently or be incorporated with ISO 9001. These are the

most important ISO certifications to consider in 2024. The best choice depends on your company's line of business and the type of products or services you offer.

Does ISO 9001 still exist? Over one million organizations worldwide are independently certified, making ISO 9001 one of the most widely used management tools in the world today.

What are the benefits of ISO 22716 2007? ISO 22716:2007 gives guidelines for the production, control, storage and shipment of cosmetic products. These guidelines cover the quality aspects of the product, but as a whole do not cover safety aspects for the personnel engaged in the plant, nor do they cover aspects of protection of the environment.

What is the current ISO standard version? This publication was last reviewed and confirmed in 2021. Therefore this version remains current. This standard has 1 amendment.

Which ISO standard should I use? If your business is totally new to the ISO standards, ISO 9001 is the most important standard to start with. It specifies the requirements for establishing a QMS or quality management system in the business.

What is the ISO standard specification? ISO standards are internationally agreed by experts. Think of them as a formula that describes the best way of doing something. It could be about making a product, managing a process, delivering a service or supplying materials – standards cover a huge range of activities.

What are GMP guidelines? GMP defines quality measures for both production and quality control and defines general measures to ensure that processes necessary for production and testing are clearly defined, validated, reviewed, and documented, and that the personnel, premises and materials are suitable for the production of pharmaceuticals and ...

What is the ISO standard for GMP? GMP guidelines were written to define the activities that enable you to obtain a product that meets defined characteristics. GMPs are critical to organisations looking to reduce the risk and liability of their products. Your organization can demonstrate compliance with GMP by implementing ISO 22716.

Who benefits from ISO standards? ISO Standards help businesses of any size and sector reduce costs, increase productivity and access new markets.

What are the 3 ISO standards? Three of the main ISO standards include the ISO 9001 for quality management, the ISO 14001 for environmental management, and the ISO 45001 for occupational health and safety management. ISO 9001 is focused on quality management and sets out the criteria for a quality management system.

What are the top 10 most popular ISO standards?

What are the 4 ISO standards? ISO 20000 (Service Management) ISO 22301 (Business Continuity) ISO 27001 (Information Security) ISO 27005 (Information Risk Management)

How do I know what ISO to use? Low values, such as ISO 100, are best for a sunny outdoor shoot. For shooting at night — or indoors with dim lighting — use an ISO of 1600 or higher. Keep the ISO setting as low as possible to minimize graininess and noise. If movement is involved, you'll need to pair a high ISO with a fast shutter speed.

What is the highest recommended ISO?

Are ISO standards used in the USA? ISO certification is not specific to any one country but is recognized and applied globally. In the United States, organizations often seek ISO certification to improve their operations, ensure quality, and meet customer and regulatory requirements.

What is the current ISO standard? As of September 2023, the current version of the ISO 9001 standard is ISO 9001:2015.

How do I find ISO standards? You can search for an ISO standard by entering the numerical part of the reference number of the document requested. For example, if you are searching for ISO 31 and its parts, enter the search criteria 31 in the ISO number field. The search result will also include any associated amendments or corrigenda.

What is ISO in simple words? ISO (International Organization for Standardization) is a worldwide federation of national standards bodies. ISO is a nongovernmental organization that comprises standards bodies from more than 160 countries, with one standards body representing each member country.

4.1 AUTO ENGINE I

4.1 Auto Engine I: An Overview

What is a 4.1 Auto Engine I?

A 4.1 Auto Engine I, also known as an Inline-4, is a type of internal combustion engine with four cylinders arranged in a straight line. These engines are typically found in smaller vehicles, such as compact sedans and hatchbacks. They are known for their efficiency, reliability, and affordability.

How does a 4.1 Auto Engine I work?

Like all internal combustion engines, a 4.1 Auto Engine I converts chemical energy into mechanical energy. The engine's pistons move up and down within cylinders, compressing a mixture of air and fuel. When the mixture reaches a high enough temperature and pressure, it ignites, creating an explosion that drives the pistons down. This downward motion is converted into rotational energy through the engine's crankshaft.

What are the advantages of a 4.1 Auto Engine I?

- **Efficiency:** 4.1 Auto Engine Is offer excellent fuel economy due to their small size and lightweight design.
- **Reliability:** These engines are known for their durability and low maintenance requirements.
- **Affordability:** 4.1 Auto Engine Is are typically less expensive than larger engines, making them a cost-effective option for many drivers.
- **Smooth Operation:** The inline arrangement of the cylinders creates a smooth and balanced engine operation, resulting in less vibration and noise.

What are the limitations of a 4.1 Auto Engine I?

- **Power:** 4.1 Auto Engine Is have limited power output compared to larger engines, especially at higher speeds.
- **Towing Capacity:** Due to their smaller size, these engines may not be suitable for towing heavy loads.
- **Low-End Torque:** 4.1 Auto Engine Is may struggle to produce adequate torque at low engine speeds, leading to sluggish acceleration.

Is a 4.1 Auto Engine I right for me?

The suitability of a 4.1 Auto Engine I depends on your specific needs and driving habits. If you prioritize fuel efficiency, reliability, and affordability, then a 4.1 Auto Engine I may be an excellent choice. However, if you require more power or towing capacity, you may need to consider a larger engine.

YOU WERE MY CRUSH TILL YOU SAID YOU LOVE ME 1ST PUBLISHED

When I'm with you Durjoy Datta review? The way Dhiren and Aishwarya's characters are portrayed in the book is just amazing. The thing that makes them amazing is that they don't lose their strength throughout the story, no matter what they face, they don't lose their originality even a bit. I never thought only one book could make him my favourite author.
