This brief article makes the case that the 'uncritical' acceptance of the real presence of saints in dreams by the participants of the Second Council of Nicaea did not reflect the usual attitudes of the Byzantine elite. It shows that earlier and later writers denied such presence through recourse to dream theory, which attributed all 'good' dreams to the agency of angels.

The popularity of guitar has ensured that it has become a significant aspect of music in leisure. This chapter explores and reflects on the author's personal leisure guitar experiences through six autoethnographic meditations. Themes from the meditations include tacit experiences, closeness, community, curiosity, and ethical dimensions associated with leisure guitar culture. These themes suggest an embodied view of

music and a social connectedness with a living music culture. Using a Foucaultian lens, these themes are critically positioned alongside the experience of the neoliberal, schooled musical subject, who encounters expressions of power and subjectification in narrow, limiting terms. The chapter concludes by suggesting that the reflective process of autoethnography, an awareness and sensitivity of the body, and explorations of emergent subject positions are critical for a reconstituted music education and that leisure and music education can be envisaged together as synchronic forms of musical action.

Chapter 2, “Selling Fiesta,” analyzes the trope of fiesta in Zumba Fitness. The trope of fiesta encompasses many stereotypes associated with the “tropics,” including happiness, dancing, and the exotic. The trope of fiesta neutralizes threatening aspects of stereotypes of Latinos, especially hypersexuality, and transforms them into consumable and desirable qualities. Fiesta reframes Latina sexuality as something that enables white women to tap into their own sexuality. Fiesta also distinguishes the alleged foreignness of tropicalized Latinness by distancing it from US domestic people of color, especially African Americans. This chapter first explains the concept of tropicalization. It analyzes the fashion line Zumba Wear, popular memes about Zumba Fitness, and the experiences of Zumba Fitness instructors to demonstrate how the trope of fiesta centers sexuality and the tropics. The chapter ends by discussing negative perception of twerking in the Zumba Fitness world to show how tropicalized Latinness becomes distanced from Blackness.

With the repeal of Prohibition and the reemergence of a domestic beer market, Willamette Valley farmers once again caught “hop fever.” Acreage expanded to its peak level in history by 1936. This chapter explains how hop farmers became more organized and initiated the first successful hop grower organizations. These organizations achieved success in marketing controls and improving the region’s reputation. Simultaneously, Willamette Valley growers successfully expanded the celebratory nature of the hop harvest by implementing a Hop Fiesta to attract workers. The event became one of Oregon’s most important annual cultural affairs,

as growers drew in thousands of harvest workers with the promise of clean camping, live music, dancing, parades, and even the crowning of a Hop Queen. Despite this success in the 1930s, however, a botanical disease, called downy mildew, had crept its way to the Pacific Coast, leaving many hop fields in ruins. By 1943, Oregon relinquished its hold as the national leader in hop production.
