

Zum rechtssystematischen Anfang in Ägypten

Eine Methodenkunde · Teil I. Zum rechtssystematischen Anfang in Ägypten.

Nachdem sich bisher noch niemand in der ägyptologischen Literatur Gedanken darüber gemacht hat, daß Recht in einem Rechtssystem zu begrenzen ist, das einen Beginn und ein Ende aufweisen kann, ist es nötig, diesen Gedanken genauer das erste Mal zu vermitteln.

Gewiß weiß heute jeder, daß etwa französisches oder englisches Recht zu anderen Ergebnissen kommen kann, als wenn man nur seine Haupttermini von einer Sprache in die andere übersetzt und daraus Schlüsse ziehen würde: Die Systeme weichen voneinander ab; sie sind aus älteren ableitbar und münden letztlich im römischen Recht samt dem kanonischen Zweig. Und schon das altgriechische war anders.

Auch Altägypten hat sein Rechtssystem und in Mesopotamien ist es wieder anders. Weshalb ist es verschieden geworden? Woraus ist ein Rechtssystem erwachsen? Und wo liegt sein Anfang? Für viele sind diese Fragen gänzlich neu; denn Rechtsgeschichte ist ein eigenes Fach, das sich aus seinen Spezialisierungen auch erst zu einem Überblick entwickeln musste.

Diese Arbeit, der begrenzte Teil einer größeren, die an „Fragen zum altägyptischen Recht der Isolationsperiode vor dem Neuen Reich“, Utz-Verlag München 1999 anschließt, versucht dabei auch zu dem dort im Vorwort genannten Projekt LAMPE/RIES von 1999 das Anliegen LAMPEs, die Frage nach der „Evolutionstrias“ von Evolution – Selektion – Stabilisierung in Kapitel 8 § 16.5 noch mit einzubringen.

Anstatt „aktuell“ auf die jüngste Literatur einzugehen, erscheint es einleitend wichtiger, im ganzen bisherigen Zusammenspiel der Forschungsgeschichte zum Alten Ägypten den eigentlichen Ort einer Rechtsgeschichte zu entdecken; denn auch das Nichterreichte kann dabei lehrhaft sein, wie alle Ansätze zu einer solchen.

Bei einem ägyptologischen weithin unbekanntem ‚Rechtssystem‘ im Mittelpunkt moderner Analyse ist es zweckmäßig, erst auf Methode und Kausalität der ganz eigenständigen ägyptischen Anfangsentwicklung das Schwergewicht zu legen, an welcher ja Religion und Staatsaufbau auch teilhaben – ausgehend von der Dynamik des Königtums, wodurch aber die Analyse der wachsenden Gesellschaftsbasis noch zurückstehen muß, wie auch die des veränderten Weltbildes im Neuen Reich.

Heideggers Spätwerk nicht als für sich isoliert stehend und interpretiert es vom Ganzen seines Denkweges her. Nicht zuletzt geht es gerade darum, dieses Ganze möglichst klar nachzuweisen und die sachliche Begründung der allmählich fortschreitenden einzelnen Schritte von Heideggers Denken innerhalb dieses Ganzen aufleuchten zu lassen. Eine besondere Beachtung wird dabei dem philosophischen Gespräch Heideggers mit Leibniz und den frühgriechischen Denkern sowie mit Klee und Hölderlin erwiesen.

BUSINESS COMMUNICATION AND RESEARCH

METHODOLOGY

What are the research methodologies of business communication? In the field of communication, there are three main research methodologies: quantitative, qualitative, and rhetorical. As communication students progress in their careers, they will likely find themselves using one of these far more often than the others.

What is communication in research methodology? At its broadest, communication research is concerned with identifying, exploring, and measuring the

factors that surround communication, in any form and regarding any topic. Often from a theory-driven perspective, but increasingly with empirically-grounded methods.

What does research methodology mean in business? Business research methods refer to the systematic process of collecting, analysing, interpreting, and converting data into actionable insights. These insights can help drive informed decision-making within an organisation. Business research management helps firms better understand their customers and self-evaluate.

What is the communicative methodology of research? The communicative methodology (CM) has been demonstrated to achieve social impacts in different fields of knowledge since it was conceptualized with the aim of being useful to society, contributing to improving individuals and collectivities under study and the society as a whole (Gómez et al., 2011).

What are the four types of research methodology? Some common types of research methodology include quantitative research, Qualitative Research Methodology, mixed-method research, experimental research, and case study research.

What are the 5 methods of communication in business?

What are the three types of communication research? Three Types of Communication Research Methods: Quantitative, Qualitative, and Participatory.

What are the steps of research in communication research?

What is critical communication in research methodology? Research methodology based on intersubjective dialogue and an egalitarian relationship between the research team and those being researched (Gomez & Latorre, 2005).

How do you write a business research methodology?

What is research methodology in business plan? In business research methodology, there are two main types. These are quantitative research and qualitative research. In the simplest terms, quantitative research is about collecting numerical and factual data, whereas qualitative research is about collecting data by

using open-ended questions.

What is research methodology with example? It involves studying the methods used in your field and the theories or principles behind them, in order to develop an approach that matches your objectives. Methods are the specific tools and procedures you use to collect and analyze data (for example, experiments, surveys, and statistical tests).

How is research methodology useful for communication? Research methods in mass communications serve as the tools and techniques used to gather, analyze, and interpret data about the media and its impact. These methods can be qualitative, quantitative, or a mix of both, each providing unique insights into the complexities of media and its audience.

What is methodology in communication? There seem to be at least three fundamental methodologies in communication, at least three fields of study which deal with the science upon which human relations are built; general semantics, group dynamics, and sociometry. Each of these contribute tools with which a communication event can be evaluated.

What is the purpose of the research methodology? A research methodology provides a framework and guidelines for researchers to clearly define research questions, hypotheses, and objectives. It helps researchers identify the most appropriate research design, sampling technique, and data collection and analysis methods.

What are the 4 P's of research methodology? Purpose, population, procedure, and publication are the four P's of the marketing research mix.

What are the three main types of research methodology? The three common approaches to conducting research are quantitative, qualitative, and mixed methods. The researcher anticipates the type of data needed to respond to the research question.

How to choose a research methodology?

What are the five C's of business communication? If you're looking to improve communications within your company, the five C's of effective communication are beneficial. Being clear, concise, direct, curious, and compassionate are what will bring about better workplace relationships and conflict resolution.

What are the 7 step of business communication? Clarity, conciseness, concreteness, correctness, completion, coherence and courtesy are the crucial principles of business communication. By using clear, concise and easy-to-understand language, you can ensure that the information is passed to an entity correctly without any ambiguity.

What are the 4 basics of business communication? The four main types include upward communication, downward communication, lateral communication, and external communication. The upward, downward, and lateral communication types refer to internal business communication or information exchanged within an organization.

What are communication methodologies? There are various different methods of communication. This includes verbal communication, non-verbal communication, listening, written communication and visual communication. Research has shown that non-verbal cues and body language, facial expressions and tone of voice account for almost 55% of all communication.

What are the types of research in business research methods?

What are the methods of communicating research findings? Methods of communication can include: • Presentations to patient organisations, patient, carer, and family groups. Leaflets, flyers, and booklets. Social media. Press releases.

What are the two major types of research methods in communication research? There are two basic types of research you might conduct with intended audiences: qualitative and quantitative. You will use methods from one of these two types depending upon what you want to learn.

The genus *Phagodrilus* (Lumbriculidae) is erected for *Phagodrilus macnabi* sp.nov., a predaceous worm with a paryngeo-esophageal region resembling that of *Agriodrilus*, a monotypic genus from Lake Baikal, often cited as a potential progenitor of the leeches. The pharynx or gizzard of *Phagodrilus* has the opposite dorsoventral orientation of its triangular section to that of *Agriodrilus* (apex dorsad in *Phagodrilus*, ventrad in *Agriodrilus*). While the latter appears closely related to *Lamprodrilus* in terms of its reproductive system, *Phagodrilus* resembles the *Stylodrilus*–*Hrabea* complex. These characteristics clearly indicate separate origins of the predatory habit and convergence of these two taxa, which suggests reexamination of the relationship between them and the leeches and branchiobdellids.

Improving Health Maintenance Among Patients with HIV by Implementing a SmartPhrase and a Care Gap in the EPIC Electronic Medical Record.

Most deaths in HIV-infected patients receiving antiretroviral therapy are now related to conditions other than AIDS. HIV infection appears to increase the risk of many non-AIDS-related conditions, highlighting the importance of preventive care, however, recommended health maintenance items unique patients with HIV (PWH) are not always accomplished. We aimed to improve health maintenance by implementing a SmartPhrase and a Care Gap package in the EPIC Electronic Medical Record (EMR).

We developed a HIV health maintenance SmartPhrase in EPIC that included the last screening dates for syphilis, gonorrhea, chlamydia, hepatitis A, hepatitis B, hepatitis C, latent tuberculosis, hyperlipidemia, diabetes and human papilloma virus and the dates of receipt of hepatitis A vaccines, hepatitis B vaccines, pneumococcal conjugate vaccines, pneumococcal polysaccharide vaccines and influenza vaccines (Figure 1). Providers can select their plan for each health maintenance item based on these data and their plans are documented in the encounter notes. Providers were educated to use the SmartPhrase in each office visit. An HIV registry was built after choosing 509 HIV related medical conditions. The health maintenance topics were displayed in a “Care Gaps” summary using the data in the HIV registry (Figure 2). Completion rates for the health maintenance items were compared before and after implementation. The health maintenance package was implemented on 3/1/2020.

CD4 every 6 months is displayed as a part of the health maintenance in a “Care Gaps” summary using the data in the HIV registry, whether their HIV is well controlled or not.

Of the 380 patients in the registry, 162 had office visits with the ID clinic from 1/1/20 to 6/5/20. Chart review of 100 patients who had office visits after implementation was performed and compared to the 62 patients prior to implementation (Table 1). The rates of hepatitis A vaccination (P= 0.001), hepatitis B vaccination (P= 0.05) and influenza vaccination (P=0.035) were increased significantly. Pneumonia vaccine administrations and anal pap smear performance compliance remained suboptimal. Providers reported that the time they spent searching for lab results and immunization records and documenting were shortened.

The rates of hepatitis A vaccination (P= 0.001), hepatitis B vaccination (P= 0.05) and influenza vaccination (P=0.035) were increased significantly.

A health maintenance package consisting of a SmartPhrase and summary display in the EMR with provider education likely helps improve health maintenance in PWH.
