JTP - Jurnal Teknologi Pendidikan. JTP. Developing Guided Reading Guidebook through Leveled Books to Improve Reading Skills of Grade 1 Students.

Guidebooks for guided reading methods through tiered books have not been found in learning reading skills. Still, based on several previous studies, the impact of using guided reading methods and tiered book media is very effective in reading skills. Therefore, this study aims to develop a guidebook product for guided reading methods through tiered books to improve the reading skills of grade 1 elementary school students. This study used a Research and Development (R&D) approach using the 4D development model, focusing on the 3 stages of 4D development namely define, design, and develop. The research subjects comprised 1 grade 1 teacher and 32 grade-1 students at SD Negeri Sarirejo 1, Demak. The data collection technique used a questionnaire which was then analyzed and described to provide an overview of the feasibility and effectiveness of the guidebook. The product feasibility test was analyzed using percentages and the product effectiveness test was analyzed using the Wilcoxon Signed Rank Test, t-test, and N-Gain test. The results of the study explained that the guidebook for guided reading methods through leveled books was said to be feasible with a value of 92.4% from media experts, 92% from material experts, and 89.7% from practitioners. The results also provide an effectiveness value through a t-test with the value of the H_a t-test analysis accepted and the N-Gain obtained is 0.63. Thus, it can be explained simply that the guidebook for guided reading methods using tiered books is feasible and effective to be used by teachers to support Indonesian language learning, especially in reading skills.

Developing an Achievement Test about 7th Grade "Solar System and Beyond" Unit: Analysis of Validity and Reliability.

The aim of this research is to develop a reliable and valid achievement test to measure academic success of pupils about 7th grade's "Solar System and Beyond" unit. For this reason, depending on the objectives of "Solar System and Beyond" unit, which is included in middle school science program, which was published in 2018, 42 multiple-choice test questions were prepared. The clearness of the test questions, cohesion with the objectives and scientific knowledge were designed with the care of various sights of the authorities in teaching science field which depend on the technic which was suggested by Lawshe (1975). According to this, content validity score was calculated as .94. The pilot study for this test put into practice with 254 students who had studied 7th grade in 2018-2019 academic years. As a

consequence of the item statistic which was realized in the process of test development by the answers of the students for each question, difficulty score and item discrimination were calculated for each of the item. As a consequence of item statistic, 8 items were excluded from the test and the last form of the “Solar System and Beyond Academic Achievement Test” was designed with 35 questions. As a result of the analysis, the last form’s KR-20 reliability co-efficient was calculated as .87. Average item difficulty index was calculated as .61 and average item discrimination index was calculated as .48. According to this outcome, average item difficulty was identified as midlevel, and average item discrimination was identified as high-level.

I PUT A SPELL ON YOU THE AUTOBIOGRAPHY OF NINA SIMONE

What is Nina A Story of Nina Simone about? The story gives readers a glimpse into the ups and downs of the life of the four time Grammy-nominated artist and Rock and Roll Hall of Fame inductee. Born in a time when her voice and talents were silenced due to the color of her skin, Nina constantly persevered to stand up for what was right.

What was Nina Simone's real name? No popular singer was more closely associated with the Civil Rights Movement than Simone. Nina Simone was born Eunice Kathleen Waymon on February 21, 1933, in Tryon, North Carolina.

Does Nina Simone have an autobiography? I Put A Spell On You: The Autobiography of Nina Simone – The Official Home of Nina Simone | The High Priestess of Soul.

When did Nina Simone song "I Put a Spell on You"? I Put a Spell on You is a studio album by American jazz singer, songwriter, and pianist Nina Simone. Recorded in 1964 and 1965 in New York City, it was released by Philips Records in 1965.

What happened to Nina Simone at age 12? She became sensitive to racism when at age 12 she gave a piano recital in a library where her parents had to stand in back because they were Black. A student of classical music at the Juilliard School of Music in New York City, she began performing as a pianist.

Why is Nina Simone a hero? The musician used her voice and songs to support the civil rights movement and speak out about crimes against Black people in America. A classically trained piano prodigy, Nina Simone blended musical genres to become one of the most respected musicians of the 20th century.

What caused Nina Simone's death?

Who inspired Nina Simone? One of Nina's stated musical influences was Billie Holiday and her inspired reading of "Porgy" (from "Porgy & Bess") heralded the arrival of a new talent on the national scene.

How old was Nina Simone when she died? She was 70. Her manager, Clifton Henderson, said she had been ill for some time, but he released no cause of death. Ms. Simone had only one Top 20 hit in her long career -- her very first single, "I Loves You, Porgy," released in 1959 -- but her following was large and loyal and her impact deep and lasting.

Is Nina Simone a diva? She began playing the piano at the age of three in a church. She studied classical piano at Juilliard. Simone once stopped mid-show and told an audience member to sit down. She was sometimes called "The Civil Rights Diva."

What was Nina Simone personality? Based on Nina Simone's public persona and behavior, it is likely that she could be classified as an INFJ personality type. INFJs are introverted, intuitive, feeling, and judging individuals who are often fiercely protective of their values and beliefs.

What voice type was Nina Simone? Nina Simone's voice is classified as a mezzo-soprano, which enables her to reach low tones, and, at the same time, belt strongly and powerfully to high notes. Her vocal timbre is prominent, featuring a unique combination of deep, melancholic soulfulness, and passionate vocal delivery.

What is the meaning of "I put a spell on you"? If something or someone casts their spell on you or casts a spell on you, you are fascinated or charmed by them. For many years sundials have cast their spell over scientists and mathematicians. People said he was able to cast a spell on the public. See full dictionary entry for spell.

Who originally wrote "I put a spell on you"? "I Put a Spell on You" is a 1956 song written and recorded by "Screamin' Jay" Hawkins. The selection became a classic cult song, covered by a variety of artists. It was Hawkins' greatest commercial success, reportedly surpassing a million copies in sales, even though it failed to make the Billboard pop or R&B charts.

What key is "I put a spell on you" in? I Put a Spell on You is written in the key of F Minor. According to the Theorytab database, it is the 8th most popular key among Minor keys and the 20th most popular among all keys. Minor keys, along with major keys, are a common choice for popular music.

Why did Nina Simone sound like that? For Nina, music was about the message being spread to others, not the way it was delivered, which is why she avoided any vocal classification. Through covers, she has been able to shape any song to fit her untutored reverberation and atypically low voice.

What was Nina Simone's biggest hit? 1 – Mississippi Goddam Try watching this video on www.youtube.com, or enable JavaScript if it is disabled in your browser. If any one song is Simone's most impactful, this is it.

How is Nina Simone brave? By taking up the cause of civil rights in her music, Simone at last found, in her words, “a purpose more important than classical music's pursuit of excellence.” It was so important that she was willing to play music that, as a classically trained pianist, she had considered beneath her.

Why did Nina Simone choose her name? To fund her lessons, she began singing and playing piano in a New Jersey bar. In an effort to keep her employment in the bar a secret from her conservative mother, she adopted the name Nina, Spanish for “little one” and “Simone” after French actress Simone Signoret.

Who was inspired by Nina Simone? That fearless diversity, along with her passionate intensity, inspired singers as wildly different as neo-soul icon Erykah Badu, goth legend Nick Cave, rock iconoclast Van Morrison, and pop superstar Christina Aguilera.

Was Nina Simone a prodigy? Nina Simone was a prodigy, just like Miles Davis and Mozart. At just 6 months old, she could recognize musical notes, and by 3, she was fully capable of playing piano by ear. Her talent was undeniable long before she took her first drug or had her first affair.

Who was Nina Simone's husband? Defendant Andrew Stroud was married to Nina Simone, who died in 2003. The couple divorced in 1970, but Stroud has been involved in several legal battles involving the rights to Simone's recordings.

Where was Nina Simone rejected from? In 1950, Simone began studying at New York's famed Juilliard music school and a year later auditioned for a scholarship to attend Philadelphia's prestigious Curtis Institute of Music. She was rejected. Simone maintained it was racism pure and simple. "I knew I was good enough, but they turned me down.

When was Nina Simone's last performance? While her final headlining concert here took place in June 2001, Nina Simone's final Carnegie Hall appearance was on April 13, 2002, as part of Sting's Rainforest Foundation benefit. She died almost exactly a year later.

This research aim to found the effectiveness of using anticipation guide on students reading comprehension by conducting pre-experimental research at the eleventh grade of SMA Negeri 5 Bulukumba as the research location and taking sample with a total of 270 eleventh grade students, while the sample used was 25 students the process of data collection using pre-test and post-test by using SPSS Vol 25. The results of this study found that the use of anticipation guide strategy in the learning process to improve students reading comprehension that considered effective based on the data obtained where the mean score of the pre-test in interpretative and literal 63.12 became 90.64 in post-test. It can be seen that the mean score of the post test is higher than the mean score of pre-test. Based on these results, it can be concluded that anticipation guide strategy is effective in improving students' reading comprehension.

. Risk Taking Behavior of Fifth Grade Children.

The research was designed to investigate risk taking behavior of military and non-military fifth grade children. The subjects consisted of 99 fifth grade students enrolled in four schools from the following areas: military, Air Force base; low economic, blue collar; suburban, middle class; and, farming, small town rural. The researcher developed and administered a 10 item risk taking instrument; in addition, the Piers-Harris Children's Self-Concept Scale was used. Three null hypotheses were tested. Sex class, four types of schools, and the scores from the six factors of the Piers-Harris Children's Self-Concept Scale were designated as the independent variables. Scores from the risk taking instrument were the dependent variable. The hypotheses were tested using the following: a one-way analysis of variance, t-test for independent data sets, and a t-test for Pearsonian product-moment correlation coefficients. Hypothesis one was not rejected; the results of the study indicated there were no differences among the types of schools attended and reported risk taking behavior. The results from this hypothesis also indicated no statistically significant difference between military and non-military children in reported risk taking behavior. Hypothesis two was not rejected; there was no reported difference between male and female subject's mean scores on the risk taking instrument. Null hypothesis three was rejected since there were statistically significant correlation coefficients between the Piers-Harris Children's Self-Concept Scale factors and the risk taking instrument. The following generalizations appear to be supported after reviewing the results of the study. There were no reported differences in risk taking behavior among the socio-economic groups. Also, there was no reported difference between military and non-military children in risk taking behavior. However, three factors from the Piers-Harris Children's Self-Concept Scale scores generated significant correlation coefficients with the risk taking instrument scores for the military dependent children. It should be noted there were no significant correlation coefficients with the factors of the Piers-Harris Children's Self-Concept Scale scores and risk taking instrument scores for any other group of children. Finally, there was no reported difference between males and females in risk taking behavior.

The purpose of this study was to examine students' understanding of and ability to interpret line graphs, using four tasks: two where students constructed a graph and two where students interpreted a given graph. The tasks were unique in that they did not simply involve the explanation of given data but included a language component that looked at students' cognitive processes and understanding while they were engaged in the tasks. The study is important because students are often able to define and even draw graphs yet perform poorly on graph interpretation items presented in high-stakes examinations. The sample for the study consisted of 91 fourth and fifth graders with and without learning disabilities (LD) from six schools in a major metropolitan area. Scoring rubrics were designed for each item. An analysis of variance by grade and group indicated no significant differences between fourth and fifth graders overall but revealed that typically achieving students performed at significantly higher levels than students with LD at both grade levels. Additional descriptive analyses looked at the patterns of errors evidenced and the nature of the students' constructions. These are discussed, and instructional implications are derived.
