## **DISPATCHES MICHAEL HERR**

**What is the summary of Dispatches by Michael Herr?** Book Summary Dispatches, by Michael Herr. Journalist Michael Herr explores the Vietnam War through the eyes of those who lived it in Dispatches. He examines how the conflict transformed both soldiers and civilians, eroding their innocence.

**What happened to Michael Herr?** Herr lived with his wife Valerie in Delhi, New York, until his death on June 23, 2016, at the age of 76.

**Is Full Metal Jacket based on Dispatches?** In screenplays. Herr worked on the narration for the movie Apocalypse Now and co-wrote the screenplay for the movie Full Metal Jacket. Several scenes and pieces of dialogue used in the book were later also used in those movies.

**Why were soldiers mentioned in dispatches?** The despatches were usually published in The London Gazette, so a mention equated to a public commendation. This and the Victoria Cross were the only forms of recognition for gallantry or distinguished service in action that could be made posthumously.

**What is the summary of the dispatcher?** Synopsis. In the wake of an unexplained phenomenon worldwide — when people are deliberately killed, they almost always disappear from their site of death and reappear, reset to several hours earlier, in a safe place — the profession of "Dispatcher" evolves.

**What happened to Michael after he left?** Towards the end of the seventh season, he marries human resources representative Holly Flax and moves to Colorado with her in "Goodbye, Michael", an extended episode. He is then absent from the series until the finale.

**What happened to Michael after the story?** Regardless of what the player decides, Michael's fate will be the same, since if he's spared, he will headbutt Franklin, losing his grip and fall to his death. Franklin walks away and calls Lamar on the phone to make amends.

**Was Michael Herr in the Vietnam War?** Herr also co-wrote the screenplay for Stanley Kubrick's Vietnam War film "Full Metal Jacket." Herr went to Vietnam in 1967 to report on the war for Esquire and to write a book. He stayed over a year, but he didn't publish the book until 1977, a couple of years after the war had ended.

**Was Private Pyle a real person?** Gomer Pyle is a fictional character played by Jim Nabors and introduced in the middle of the third season of The Andy Griffith Show.

**How true is Full Metal Jacket?** The film is loosely based on true stories from the war, adapted from the semi-autobiographical novel The Short-Timers by Gustav Hasford. The Tet Offensive, a significant historical event, is depicted in the film through Joker's experiences in the Battle of Hu?.

**Is Full Metal Jacket disturbing?** There is a lot of violence and disturbing imagery, but it's enough for someone around my age to endure. No nudity, drinking, or smoking, but there are slurs and jokes hinting at adult actions.

## **SOLUTION OF NCERT CLASS 10 TRIGONOMETRY**

Towards Excellence. Towards Excell.. NCERT CLASS 1 ENGLISH MARIGOLD: WORD LIST BY FREQUENCY.

Studies in psycholinguistics, memory and psychological assessment of vocabulary and related measures may be greatly facilitated in our country through a uniform word list by frequency based on common textbook used across the country. Present study has used NCERT Class 1 English Textbook Marigold to analyse the word frequencies and prepare an academic word list for the researchers. Findings are

discussed in terms of size of vocabulary, word length, word frequencies, word types, word tokens, and PoS tags unit wise and on the whole.

Trigonometric equations and their solution. Asian Research Journal of Mathematics. ARJOM. Differentiated Instruction in Plane Trigonometry Class.

This study aimed to determine the effectiveness of differentiated instruction on students' achievement in Plane Trigonometry. It tried to determine the pretest and posttest performance of experimental and control groups, the difference on scores of students in the pretest and in the posttest, and the difference from pretest to posttest scores in the two groups of students. The quasi-experimental design was used in the study. Two intact class of first year college students enrolled in Plane Trigonometry in School Year 2017-2018 were purposively sampled and used for the study. One class was randomly assigned to experimental group while the other served as the control group. Instructions were made using flexible groupings and varied formats (cooperative learning, individual or group projects, and whole-class discussion) with various strategies such as agenda, compacting, cubing, vocabulary choice boards, tier assignment, think-tac-toe, and RAFT activity. The students explored, collaborated, worked in pairs or groups in different activities. Data were tabulated and analyzed using frequency counts, percentages, and t-test for independent samples with the aid of the statistical package for Social Sciences (SPSS) software. The findings revealed that the experimental group and control groups showed significant improvement in students' performance in plane trigonometry. However, the score suggested that the improvement of the scores under the experimental group was defined and noticeable. Generally, the results revealed that students who were taught differentiated instruction performed better than those taught using the

conventional instructional approach.

. Scholarly Research Journal for Humanity Science & English Language. SRJHSEL. Construction of an Achievement Test in General Science for Class IX Based on NCERT Syllabus.

Achievement test is of very important assessment tool to evaluate the student's current level of knowledge and skill acquired from classroom instruction. This test is designed to evaluate the student's level of achievement in a particular subject for a particular class prescribed under the board or the university. In other words, to assess how much the pupils have achieved the educational objectives in teaching learning process at the end of the course and if achieved then to what extent, it has been achieved. Achievement tests are proved to be very helpful in various ways to the people who are involved in the field of education such as the teachers, the administrators, the planners, to the parents as well as for the students. The teacher very carefully develops and conduct achievement test in the class which enable the teacher to get an overall idea of the progress or the level of achievement of his students in the subject area. The teacher can determine the pupil's strength and weakness in the subject area. So, based on this the teacher can take necessary remedial instructional strategies for the betterment of the pupil's progress. In the same time, it also provides feedback for the teaching efficiency of the teacher. As with the time changes there have been many educational reforms taken place and in between syllabus had also been changed under different Boards of Studies. In order to maintain uniform standard of education the Government has formulated a policy to implement NCERT syllabus common to all School Boards throughout the country and accordingly the State Board of Secondary Education, Assam (SEBA) follow NCERT syllabus and to evaluate students' achievement in terms of the policy formulated by the Board. Till now, no any standardized achievement test has been conducted for the secondary school students of Assam. Therefore, the investigators felt to construct and standardize an achievement test in the subject General Science which will definitely help in educational research.

TRIGONOMETRY: SOLUTION OF TRIANGLES, ETC.. Transactions of the Royal Society of Edinburgh. Trans. R. Soc. Edinb.. XI. *A proposed Improvement in the Solution of a Case in Plane Trigonometry.*

In the present state of mathematical science, cultivated as it has been, with assiduity, during the two preceding centuries, it can hardly be expected that any considerable improvement remains to be made in Plane Trigonometry, one of its most elementary theories. There is, however, one case in the resolution of oblique-angled triangles, which appears to me to admit of a solution somewhat more simple and convenient than those which are commonly known; it is that in which two sides and the included angle are given to find the third side.

## **KAJIAN MENGENAI PENGGUNAAN E PEMBELAJARAN E LEARNING DI**

**Apa yang dimaksud dengan pembelajaran berbasis E-Learning?** E-learning adalah singkatan dari elektronik learning atau pembelajaran elektronik. Bullen & Jeans (2007:176) mendefinisikan e-learning sebagai proses pembelajaran yang menggunakan teknologi internet untuk memfasilitasi, menyampaikan, dan memungkinkan berjalannya proses pembelajaran jarak jauh.

**Mengapa harus menggunakan E-Learning dalam kegiatan pembelajaran?** Tetapi, melalui E-Learning, proses belajar menjadi lebih fleksibel dan nyaman

sehingga meningkatkan motivasi siswa untuk belajar. Siswa dapat mengakses materi E-Learning nya kapan pun dan di mana pun menggunakan berbagai jenis gadget yang mereka miliki.

**Jelaskan apa kelebihan yang menonjol dalam penggunaan E-Learning dalam pembelajaran?** Dapat diakses dengan mudah Cukup menggunakan smartphone atau perangkat teknologi lain seperti laptop yang terhubung dengan internet Anda sudah bisa mengakses materi yang ingin dipelajari. Dengan menerapkan e-learning Anda dapat melakukan kegiatan pembelajaran di mana saja, kapan saja.

**Sebutkan apa saja yang perlu disiapkan dalam menggunakan E-Learning?** Utamanya, ada tiga hal yang perlu disiapkan oleh sekolah dan pengajar agar pembelajaran online bisa berjalan dengan baik. Yaitu perangkat dan akses internet, platform e Learning, dan metode pembelajaran online yang akan digunakan.

**Jelaskan apa yang dimaksud dengan e-learning dan berikan contohnya?** E-learning adalah model pembelajaran yang saat ini cukup populer. Anda bisa lihat dari banyaknya layanan kursus online seperti Zenius, Udemy, Niagahoster Course, dll. Salah satu daya tarik e-learning adalah formatnya yang beragam. Mulai dari video, PDF, kuis, hingga game.

**Apa yang anda ketahui tentang konsep pembelajaran dengan e-learning?** Yaitu merupakan Sistem pembelajaran elektronik atau e-pembelajaran (Inggris: Electronic learning disingkat E-learning) dapat didefinisikan sebagai sebuah bentuk teknologi informasi yang diterapkan di bidang pendidikan berupa website yang dapat diakses di mana saja.

**Ada 3 fungsi e-learning sebutkan sebagai apa saja?** Setidaknya ada 3 (tiga) fungsi pembelajaran elektronik terhadap kegiatan pembelajaran di dalam kelas (classroom instruction), yaitu sebagai suplemen yang sifatnya pilihan/opsional, pelengkap (komplemen), atau pengganti (substitusi) (Siahaan, 2002).

**Mengapa pembelajaran dengan e-learning menjadi sangat penting saat ini?** Dampak positif penggunaan E-Learning seperti : Siswa dapat melakukan pembelajaran dengan mudah dan efisien. Siswa dapat mengetahui segala materi pembelajaran dengan mudah dan sesuai yang diinginkan oleh siswa. Siswa dapat

mengikuti perkembangan teknologi yang berkembang semakin pesat.

**Apa fungsi utama dari e-learning?** Pembelajaran utama Fungsi terakhir dari e-Learning adalah sebagai pembelajaran utama. Artinya, sekolah tidak lagi menerapkan sistem pembelajaran secara offline. Hal ini sudah sangat umum dilakukan di luar negeri bahkan sebelum COVID-19 ada di seluruh dunia.

**Mengapa e-learning bermanfaat?** Di antara banyak manfaat pembelajaran online, Anda akan menemukan bahwa pendidikan virtual memungkinkan Anda menikmati jadwal yang lebih fleksibel, dapat mengurangi biaya gelar Anda, dan memungkinkan Anda mengembangkan karier dengan lebih mudah seiring dengan melanjutkan pendidikan Anda .

**Apa itu e-learning serta kelebihan dan kekurangannya?** Ada kelebihan pembelajaran online seperti aksesibilitas, biaya rendah, dan kenyamanan . Namun, kelas online juga memiliki kelemahan seperti kurangnya interaksi manusia, masalah plagiarisme, dan terputusnya hubungan dengan instruktur.

**E-learning mencakup apa saja?** E-learning dapat mencakup berbagai bentuk, termasuk kursus daring, webinar, video pembelajaran, platform belajar daring, dan banyak lagi.

**Apa saja aspek penting dalam E-Learning?**

**Apa contoh aplikasi E-Learning?**

**Apa saja tiga kriteria E-Learning?**

**Bagaimana cara menggunakan e-learning?** Tetapkan tujuan yang dapat diikuti oleh siswa Anda, gunakan multimedia dan alat (dengan bijak), jaga agar informasi Anda tetap sederhana, libatkan siswa dengan aktivitas latihan yang menyenangkan, uji siswa Anda, dan kaitkan konten Anda ke dalam konteks dunia nyata . Ini adalah kunci keberhasilan kursus eLearning.

**Bagaimana konsep e-learning?** E-Learning atau electronic learning merupakan sebuah metode pembelajaran dengan memanfaatkan alat-alat elektronik secara dalam jaringan atau online. E-Learning memungkinkan proses mengajar dan belajar dapat dilakukan oleh siapa pun, kapan pun, dan di mana pun.

---

**Apakah e-learning termasuk model pembelajaran?** Salah satu model pembelajaran yang ditawarkan adalah model inovasi e-learning. e-Learning atau electronic learning kini semakin dikenal sebagai salah satu cara untuk mengatasi masalah pendidikan, baik di negara-negara maju maupun di negara yang sedang berkembang.

**Apa itu e-learning dengan kata sederhana?** eLearning (e-learning, pembelajaran elektronik) adalah jenis pendidikan online, pelatihan, dan berbagi pengetahuan yang dilakukan melalui Internet . Hal ini dapat dimanfaatkan dalam berbagai situasi, seperti pendidikan akademis, pelatihan perusahaan, pengembangan profesional berkelanjutan, dan kursus pengembangan keterampilan.

**Materi pelajaran dalam e-learning dapat berupa apa saja?** Materi yang disajikan e-learning dapat berupa teks yang dibentuk dalam format dokumen, berbentuk video pembelajaran, berbentuk audio atau suara penjelasan saja, bahkan ada juga yang dalam bentuk streaming video di YouTube.

**Komponen pembelajaran apa yang penting yang harus ada di e-learning?** Tiga komponen kegiatan belajar online yaitu: 1) model belajar online berbasis pedagogik, 2) strategi belajar dan pembelajaran secara online, dan 3) teknologi yang digunakan belajar online.

**Apa yang dimaksud dengan pembelajaran Based learning?** PBL merupakan metode pembelajaran dimana mahasiswa dihadapkan dengan masalah-masalah kesehatan yang ada dalam kehidupan nyata, untuk kemudian digunakan sebagai pemicu dalam belajar.

**Apa yang dimaksud dengan media pembelajaran e-learning?** E-Learning merupakan sebuah media elektronik yang dapat dimanfaatkan dalam kegiatan pembelajaran. Guru dapat menilai perubahan siswa dengan penggunaan E-Learning. Guru menilai bentuk keaktifan atau hasil belajar siswa melalui pembelajaran E-Learning. E-Learning juga dapat digunakan dengan media blog seperti google ...

**Apa itu e-learning dengan kata sederhana?** eLearning (e-learning, pembelajaran elektronik) adalah jenis pendidikan online, pelatihan, dan berbagi pengetahuan yang

dilakukan melalui Internet . Hal ini dapat dimanfaatkan dalam berbagai situasi, seperti pendidikan akademis, pelatihan perusahaan, pengembangan profesional berkelanjutan, dan kursus pengembangan keterampilan.

**Jelaskan apa yang dimaksud dengan pendekatan e-learning?** Pengertian lain, E-learning adalah pembelajaran jarak jauh (distance learning) yang memanfaatkan teknologi komputer, jaringan komputer dan/ atau internet.
