There is no more controversial or troubling topic with respect to Islam than that of jihad. Public debates over whether use of a term that many have come to associate with terrorism should even be permitted in the public sphere have come to dominate American discussions of Islam in the aftermath of the terrorist attacks of September 11, 2001. These events raised many questions about the relationship between Islam and terrorism. Were the two irrevocably connected or was this a perverse distortion of Islam's teachings? As information about the perpetrators of these horrific events slowly became available, Americans not only heard a great deal about the exiled Saudi dissident Osama bin Laden and his shadowy Al-Qaida terrorist network, but they also became familiar with the term Wahhabi and the fact that fifteen out of the nineteen hijackers involved in these attacks were Saudi. For some, the implications were clear. Wahhabis and Saudis were inherently terrorists.
